

Installation Guide

Android

- Open the build link in browser, which opens the installation page with details of the app version, release notes and a button to install it
- Click on **"Install"** to install it on the device, this will download the app installation file **"app-release.apk"** to the mobile device storage
- After successful download, open the installation file location in a file browser. Click on the installation file to start installing.
- A popup will be shown with two buttons
 - **"Cancel"** => Click on it to cancel the app installation
 - **"Install"** => Click on it to install the app on the mobile device
- Clicking on **"Install"** will continue the app installation
- After successful installation, a popup will be shown with two buttons
 - **"Done"** => Click on it to dismiss the popup
 - **"Open"** => Click on it to open the TransitNet Mobile App
- The installed app can also be found on the app listing

iOS

- Open the build link in browser, which opens the installation page with details of the app version, release notes and a button to install it
- Click on **"Install"** to install it on the device, this show a confirmation popup. Click **"Install"** in popup alert and continue installing the app
- If tried to open the app, this will throw an error **"Untrusted Enterprise Developer"** error. Click **"Cancel"** to dismiss.
- Now open **Settings > General > VPN & Device Management**
- Click on **"SGS Group Management SA"**
- Click on **"Trust SGS Group Management SA"**
- A popup will open. Click on **"Trust"** to be able to open the app
- Now after trusting, the TransitNet Mobile App should be able to open now.
